DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1 – Optical wavelength selection device wherein the diffraction grating assembly comprises a first transmission diffraction grating, a reflective mirror disposed behind said grating and a quarterwave retardation plate disposed between said diffraction grating and said mirror – claims 4, 6, 8, 9

Species 2 - Optical wavelength selection device wherein the diffraction grating assembly comprises a reflection diffraction grating element, a reflective mirror disposed behind said reflection grating element and a quarterwave retardation plate disposed between said grating and said reflective mirror – claims 5, 7

Species 3 - Optical wavelength selection device wherein the diffraction grating assembly comprises a first diffraction grating element, a second diffraction grating element and a halfwave retardation plate disposed between said first grating and second grating element – claims 10, 11

Species 4 - Optical wavelength selection device comprising an optical beam source, means for collimating said optical beam to produce a collimated optical beam, a diffraction grating assembly for diffracting said collimated optical beam, a means for modifying the polarization state of the collimated optical beam wherein said means for modifying the polarization state of said collimated optical

Art Unit: 2872

beam is disposed before said grating assembly wherein diffraction grating assembly is a dual cascaded arrangement – claims 12-20

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3 are generic to species 1, 2 and 3.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2872

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
